PROFESSIONAL SUMMARY

Junior Frontend Developer with a background in Release Management and QA, building accessible and user-friendly web applications using **HTML**, **CSS3**, **JavaScript (ES6+)** and **React**, .

Delivered 5+ live projects within Agile environments, collaborating with cross-functional teams and using Git/GitHub for version control.

Brings a strong blend of frontend engineering, quality assurance, and delivery-focused thinking to create reliable, high-performing digital experiences.

Key Achievement

- **Winner – "Developing with Large Language Models" Hackathon, Westminster Business School (September 2025)**
  Collaborated within a cross-functional team to design and deliver a web application providing first-aid guidance for adults and children. Contributed to frontend development, UI implementation, and final solution presentation within tight time constraints.

SKILLS

- **Web Development:** HTML, CSS, JavaScript (ES6+)
- **Frameworks**: React.js
- **Tools:** Git, GitHub, Jira, Confluence, Figma
- **Testing**: Jest
- **Development Practices**: Agile, code reviews, pair programming, debugging, QA testing

---

PROJECTS

- [**TV Shows Listing**](TV Shows Listing) **(Vanilla JavaScript)**
  - Built a responsive web application using HTML, CSS, and Vanilla JavaScript
  - Consumed data from a public API to display TV shows and episode information
  - Implemented DOM manipulation, event handling, and dynamic rendering of content
  - Focused on clean UI, usability, and readable code structure

- [**Spaced Repetition Tracker**](Spaced Repetition Tracker) **(Vanilla JavaScript)**
  - Developed a web app using HTML, CSS, and JavaScript to help users track topics over increasing review intervals
  - Implemented custom scheduling logic (e.g. 1 week, 1 month, 3 months, 1 year)
  - Managed application state using JavaScript objects and arrays

- [**Calendar App**](Calendar App) **(Vanilla JavaScript)**
  - Built a calendar application using Vanilla JavaScript to calculate and display annual events with non-fixed dates
  - Implemented date logic to handle recurring patterns (e.g. second Tuesday of October)
  - Strengthened problem-solving and date manipulation skills

- [**Shared Bookmark**](Shared Bookmark) **(Vanilla JavaScript)**
  - Created a bookmarking web app using **HTML, CSS, and JavaScript**
  - Allowed users to save and share links with descriptions
  - Implemented form handling, validation, and dynamic UI updates

- [**Grace Empowerment Assembly website**](Grace Empowerment Assembly website) **(React)**
  - Built a production-ready website using React, JavaScript, HTML, and CSS
  - Implemented reusable components and structured layout for content pages
  - Collaborated with stakeholders to deliver a live website for a local community organisation

WORK EXPERIENCE

Just Start Media | Social Media Manager London, UK | January 2024 – January 2025

- **Developed and executed** multi-channel organic growth strategies for TikTok, YouTube, and Facebook, resulting in a 45k+ follower increase on Facebook within 90 days.
- **Analyzed** performance data via Google Analytics to conduct A/B testing on creative assets, increasing click-through rates (CTR) by 25% and average watch time by 30%.
- **Managed** QA for 100+ monthly campaign assets, maintaining 99% brand consistency and accuracy across all digital platforms.
- **Optimized** audience targeting and digital troubleshooting workflows, reducing content error rates by 20% through data-driven refinement.

Babylon Health (eMed) | Release Manager London, UK | September 2022 – January 2024

- **Coordinated** the release lifecycle for 8 applications, collaborating with cross-functional teams to increase release frequency by 25% while maintaining 100% on-time delivery.
- **Performed** rigorous QA testing on hundreds of builds, identifying and resolving 95% of critical bugs prior to production deployment.
- **Administered** 200+ monthly tickets using Jira and Confluence, streamlining team communication and accelerating issue resolution cycles.
- **Resolved** critical release bottlenecks and technical issues, reducing system downtime incidents by 20%.
